ADOPTED RESOLUTIONS

F'20-1: Recognition for Exemplary Service for Dean Wilkerson

- EMRA recognizes Mr. Dean Wilkerson for his exemplary dedication and service to residents, resident education and our organization

F'20-2: Fair Compensation for EM Physicians-in-Training

- EMRA will create a task force to study EM resident compensation, productivity, and billability in the context of fair compensation for trainees

F'20-3: Planning for EM Resident Illness and Occupational Exposure

- EMRA reaffirms the Family Leave Policy
- EMRA will unequivocally support easy and unconditional access to PPE for EM trainees
- EMRA supports a resident and medical student choice to use PPE not provided by a hospital that meets or exceeds institutional standards if they do not feel adequately protected by PPE provided by their institution

ADOPTED RESOLUTIONS

F'20-4: EM Resident Nourishment and Hydration While on Duty

- EMRA supports adequate accommodations to allow for the consumption of food and drink in the workplace
- EMRA will support policies that encourage appropriate nourishment and hydration for EM residents and medical students while working

F'20-5: Policing and Emergency Medicine

- EMRA recognizes excessive use of force by police as a public health issue
- EMRA will work with relevant stakeholders to support legislation that restricts excessive use of force by law enforcement and promotes evidence-based harm reducing law enforcement tactics
- EMRA opposes the use of medicine administration for the purpose of restraint or de-escalation by non-medical personnel
- EMRA will work with relevant stakeholders to support a) implementation of evidence-based practices regarding the use of medicine administration for the purpose of restraint or de-escalation
- EMRA supports efforts by emergency departments, hospitals, law enforcement and other organizations to document and publish data on the health impacts of the excessive use of force by law enforcement

ADOPTED RESOLUTIONS

Artificial and Augmented Intelligence in Emergency Medicine

- Augmented intelligence should have proven benefits to clinical decision making, clinical workflows, or patient safety
- Any required use of augmented intelligence must ensure that the entity requiring its use assumes applicable liability
- Any use of augmented intelligence ensures that all protected health information is securely stored and transmitted to safeguard patient privacy and that any use of the information be disclosed to the patient prior to using it
- Any application or development of augmented intelligence must take steps to mitigate and prevent the perpetuation of historical and current bias and should undergo a rigorous review process to ensure stakeholder inclusion and participation
- The methods behind augmented intelligence design and deployment must be transparent to the clinicians who are expected to use them, must provide reproducible results, and be peer reviewed.
